1.0	August 22, 2026	The Powerzone Developer Team	Initial Draft & Baseline Requirements

1. Introduction

1.1 Purpose

The purpose of this Software Requirements Specification (SRS) document is to define the functional, non-functional, and structural requirements for the PowerZone Web Platform. It serves as the primary specification for development, design, testing, evaluation, and future maintenance by clearly defining the system behaviour, constraints, interfaces, and acceptance conditions.

1.2 Scope

The system encompasses a multi-page, client-side web application that allows users to view PowerZone information, explore classes and programs, navigate between website sections, claim a free pass, and initiate class-specific trial booking through interactive forms. The current Phase 1 scope focuses on website presentation, navigation, client-side validation, and interactive lead capture. Back-end payment processing, permanent member-management database operations, and full appointment scheduling are outside the current Phase 1 scope.

1.3 Definitions, Acronyms, and Abbreviations

- **CTA:** Call to Action
- **DOM:** Document Object Model
- **HIIT:** High-Intensity Interval Training
- **SRS:** Software Requirements Specification
- **UI/UX:** User Interface / User Experience

1.4 References

- IEEE Standard 830-1998 (Recommended Practice for Software Requirements Specifications)
- PowerZone Fitness Brand & Copy Style Guidelines
- W3C HTML5 / CSS3 Specifications

1.5 Document Overview

This document is organized into functional requirements, non-functional constraints, external interface details, business logic, system architecture, and verification criteria based on standard industry templates.

2. Overall Description

2.1 Product Perspective

The system functions as a lightweight, standalone, high-converting digital storefront and interactive booking gateway designed for cross-platform desktop and mobile web environments.

2.2 Product Functions

- Present value propositions, key facility differentiators, and member testimonials.
- Display detailed class schedules, difficulty levels, target demographics, and FAQs.
- Capture member inquiries and free pass claims via asynchronous, interactive UI modals.
- Provide unified navigation and seamless routing between site sections and external documents.

2.3 User Classes and Characteristics

- **Prospective Members:** First-time visitors seeking gym details, class descriptions, pricing value, and trial offers. Technical skill level is general/consumer.
- **Active Members:** Recurring athletes reviewing class descriptions, schedules, and facility guidelines.
- **System Administrators:** Staff updating copy, adjusting class tiers, and managing lead integrations.

2.4 Operating Environment

- **Platform:** Any modern web browser (Google Chrome 110+, Mozilla Firefox 110+, Apple Safari 16+, Microsoft Edge 110+).
- **Devices:** Desktop displays, laptops, tablets, and smartphones (viewports from 320px to 4K).

2.5 Design and Implementation Constraints

- Must adhere to dark-theme visual standards (#0f1115 base, #ff3b30 accent).
- Must run client-side without external CSS/JS framework dependencies (Pure Vanilla HTML5/CSS3/JavaScript).

2.6 Assumptions and Dependencies

- Users operate on devices with JavaScript enabled to execute modal dialogs and dynamic form handling.

3. Functional Requirements

Field PDF	Details PDF
Requirement ID	FR-001
Requirement Name	Free Pass Lead Capture Modal System
Description	The system must launch an interactive modal when any "Claim Free Pass" or "Strategy Session" CTA button is triggered.
Priority	High
Preconditions	User lands on <code>index.html</code> or clicks relevant CTAs on <code>classes.html</code> .
Inputs	Full Name (Text), Email Address (Email), Phone Number (Tel).
Processing / Business Logic	Validate fields for emptiness and format; suppress page reload; transition UI form state to an instant success confirmation box.
Outputs	Visual confirmation banner ("✔ Offer Confirmed!") with instructional text.
Exceptions	Missing required fields trigger browser-native validation warnings.

Field PDF	Details PDF
Acceptance Criteria	Modal opens instantly upon click (<100ms) without refreshing or scrolling the page to top.
Dependencies	DOM Event Listeners, Vanilla JS modal controller.
Field PDF	Details PDF
Requirement ID	FR-002
Requirement Name	Class-Specific Trial Booking Modal
Description	Clicking "Book a Trial Class" must open a modal pre-populated with that specific class title.
Priority	High
Preconditions	User is browsing the <code>classes.html</code> program list.
Inputs	Full Name, Email, Preferred Time Slot (Morning / Midday / Evening).
Processing / Business Logic	Read parameter from button trigger, inject string into modalTitle, validate time selection.
Outputs	Class-specific confirmation UI confirmation view.
Exceptions	Unselected time slot halts form submission.
Acceptance Criteria	Modal dynamically updates heading to match the selected class (e.g., "Book: Iron & Alloy").
Dependencies	<code>openClassModal(className)</code> JS function.
Field PDF	Details PDF
Requirement ID	FR-003
Requirement Name	Cross-Page Navigation & Active State Tracking

Field PDF	Details PDF
Description	Site header and footer must allow bi-directional routing across <code>index.html</code> and <code>classes.html</code> .
Priority	Medium
Preconditions	Web files reside in the same relative root directory.
Inputs	Mouse clicks or tap interactions on nav elements.
Processing / Business Logic	Route browser to designated relative URL or internal anchor identifier.
Outputs	Target viewport view rendered without broken path errors (404).
Exceptions	None.
Acceptance Criteria	100% of header and footer navigation links resolve cleanly.
Dependencies	Relative file path mapping.

4. Non-Functional Requirements

4.1 Performance

- Initial page load time must execute under 1.5 seconds on standard broadband connections.
- Modal render latency must not exceed 100ms from user trigger.

4.2 Security

- Form inputs must be sanitized client-side against basic cross-site scripting (XSS) before DOM insertion.
- All future external POST communication must route over HTTPS/TLS 1.3.

4.3 Availability and Reliability

- The static client-side architecture must deliver 99.99% availability independent of dynamic back-end server states.

4.4 Usability and Accessibility

- Color contrast between text (`#ffffff`, `#a0a5b1`) and background (`#0f1115`, `#181b22`) must satisfy WCAG 2.1 AA standards.

- Layout must be fully responsive across mobile, tablet, and desktop breakpoints.

4.5 Maintainability

- HTML structure must use semantic elements (<header>, <nav>, <section>, <footer>) and maintain decoupled, inline CSS variables for styling flexibility.

5. External Interface Requirements

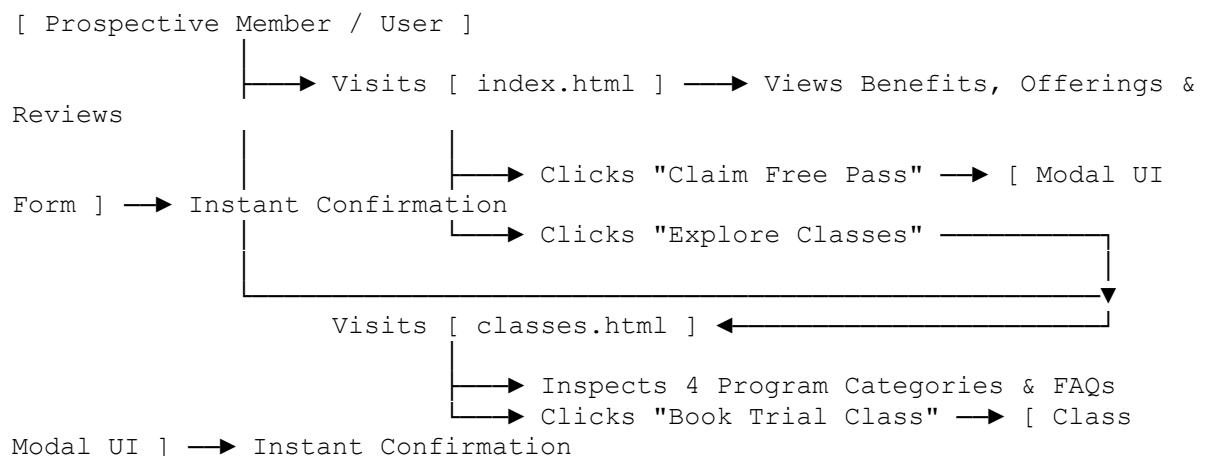

5.1 User Interfaces

- **Color Palette:** Dark Carbon (#0f1115), Card Slate (#181b22), Crimson Accent (#ff3b30), Text Gray (#a0a5b1), Pure White (#ffffff).
- **Typography:** Clean sans-serif system stack (Segoe UI, Tahoma, Geneva, Verdana, sans-serif) with bold, uppercase header treatments.

5.2 Hardware & Communication Interfaces

- Compatible with standard pointing devices, touchscreens, and trackpads.
- Transmits requests via standard HTTP/HTTPS protocols over TCP/IP.

6. System Architecture & Flow

7. Data Requirements

- **Captured Entities:**
 - Lead: fullName (String, Required), emailAddress (Email, Required), phoneNumber (Tel, Required), programInterest (String, Optional), timeSlot (Enum: Morning, Midday, Evening).
- **Storage & Privacy:**
 - Client-side verification only in Phase 1; data is processed ephemerally during active sessions in accordance with standard privacy practices.

8. Business Rules

- 1. **Free Trial Eligibility:** Each prospective member is eligible for one (1) Free 7-Day Pass.
- 2. **Cancellation Grace Period:** Users can cancel or reschedule trial bookings up to 2 hours prior to scheduled class start times.
- 3. **Safety Waivers:** First-time trial attendees must arrive 15 minutes early to complete standard safety induction protocols.

9. Acceptance Criteria

- **AC-1:** All hero and offering CTA buttons trigger responsive modals with active confirmation handlers.
- **AC-2:** Responsive styles resize grid modules across viewports without horizontal scrolling or overflow breakage.
- **AC-3:** Zero console errors during standard modal activation and dismissal sequences.

10. Appendices

10.1 Traceability Matrix

Requirement ID PDF	Specification PDF	Status	Verified Component
FR-001	Free Pass Modal	Completed	index.html modal module
FR-002	Class Trial Modal	Completed	classes.html modal module
FR-003	Unified Interlinking	Completed	nav / footer global links
NFR-004	Responsive Breakpoints	Completed	Media queries (@media max-width: 768px)
